-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 25-27, drawn to the column address counter of figure 7, classified in class 711, subclass 167.
- II. Claims 41-44, drawn to the data input clock generation circuit of figure 3, classified in class 711, subclass 167.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a column address counter for any memory – not necessarily based on that of the clock signals produced in group II and shown in figure 3. See MPEP § 806.05(d).

It is also important to note that the claims, while generally classified in 711/167, require divergent searches into class 365 and other subclasses of class 711. For example, data latches and amplifiers are not required in group I, but a divided clock signal is not required for group II.

A telephone call was made to Thomas E. Brown (#44,450) on 15 June 2004, but did not result in an election via telephone.
